# CLARUS PEDIATRIC SHIKANI

30001-10

The Clarus Pediatric is designed to give you superior access to the pediatric airway. With its malleable stylet and atraumatic tip, the Clarus Pediatric gives you the size and features needed for a successful intubation. Optimum grade fiberoptics and a high-resolution eyepiece make this stylet a must for those working with delicate airways.

- Conveniently sized for portability
- ① High-resolution eyepiece for confident placements
- ② Port for oxygen insufflation
- ③ Malleable stylet accommodates ET tubes size 5.5 and below
- ④ Atraumatic tip helps protect sensitive airways
- ⑤ Soakable stylet and light source allow for safe and efficient sterilization
