MEDICAL GRADE FLEXIBLE INSPECTION BORESCOPE

Damage
Debris
Discoloration
Moisture

CLARUS MEDICAL
CLARUS INSPECTION SCOPES allow for early visual detection of internal debris and damage to reduce risk of costly device-related infections.

DID YOU KNOW? $9.8 billion is spent annually treating the top 5 hospital-acquired infections (HAIs). A recent study utilizing a borescope to look inside internal channels found irregularities in 100% of ureteroscopes such as staining or debris.

EASY TO USE
INTERCHANGEABLE DESIGN
New Inspection Control Module can operate ALL scope length and diameter options.
• 1.06mm outer diameter, smallest digital scope on the market
• 1.83mm outer diameter
• Lengths up to 220cm

FLEXIBLE SETUP
• USB Inspection Control Module operates on PC or Tablet
• HDMI Inspection Control Module allows for operation without a PC (no software required)

DURABLE
As a leading inspection borescope designer and manufacturer, we are focused on improved features, durability and performance

DOCUMENTATION
With the ability to capture video and still-frame images, you can document compliance with:
• Scope Quality Assurance
• IFU Cleaning Verification Steps
• Inspection of Loaned Devices

ABOUT US
Clarus Medical has over 30 years’ experience designing and manufacturing small diameter, high-quality medical endoscopes. We also partner with leading medical companies as their OEM manufacturer.

INDUSTRY STANDARDS
ANSI/AAMI ST91: 2015 “Tools such as video borescopes of an appropriate dimension (length and diameter) may be used to visually inspect the internal channels of some medical devices.”

2017 AORN Guidelines “Lighted magnification should be used to inspect endoscopes and accessories for cleanliness and damage.”

ANSI/AAMI ST79: 2017 “Enhanced inspection with magnification, borescopes, or other inspection methods to verify cleanliness and integrity may be used. Borescopes or other methods may be used to check internal channels of instrumentation...

Stryker Shaver IFU: “Visually inspect the handpiece, including all internal surfaces, for remaining soil. Use an endoscopic camera and endoscope if necessary to see the inner surface of the lumen.”
